

# Support new Wilson disease medicine by sharing your journey

AllStripes is partnering with Wilson disease patients and families to create a database that will support multiple research efforts, including a Deep Genomics genetic medicine with an upcoming clinical trial. You can contribute to this effort and support Wilson disease research by sharing your de-identified medical records. AllStripes can also pre-screen you for the upcoming trial when you join the program.

## Participate from home

- 1 Sign up at [allstripes.com/wilson](https://allstripes.com/wilson)
- 2 We do the rest: Our team collects the records, at no cost, and extracts insights to power research

## Why participate?

- 1 Help power faster, better drug development for Wilson disease
- 2 Receive all your medical records in a secure account, at no cost
- 3 Get exclusive updates on the progress of our research

---

## What is AllStripes?

AllStripes is a platform that makes it easy for rare disease patients and caregivers to contribute to drug development research from home. We improve the speed and design of drug trials by extracting and analyzing research-grade data from de-identified medical records, creating a pool of new knowledge about each rare condition.
